

BOSCH SMART HOME REMOTE CONTROL TWIST

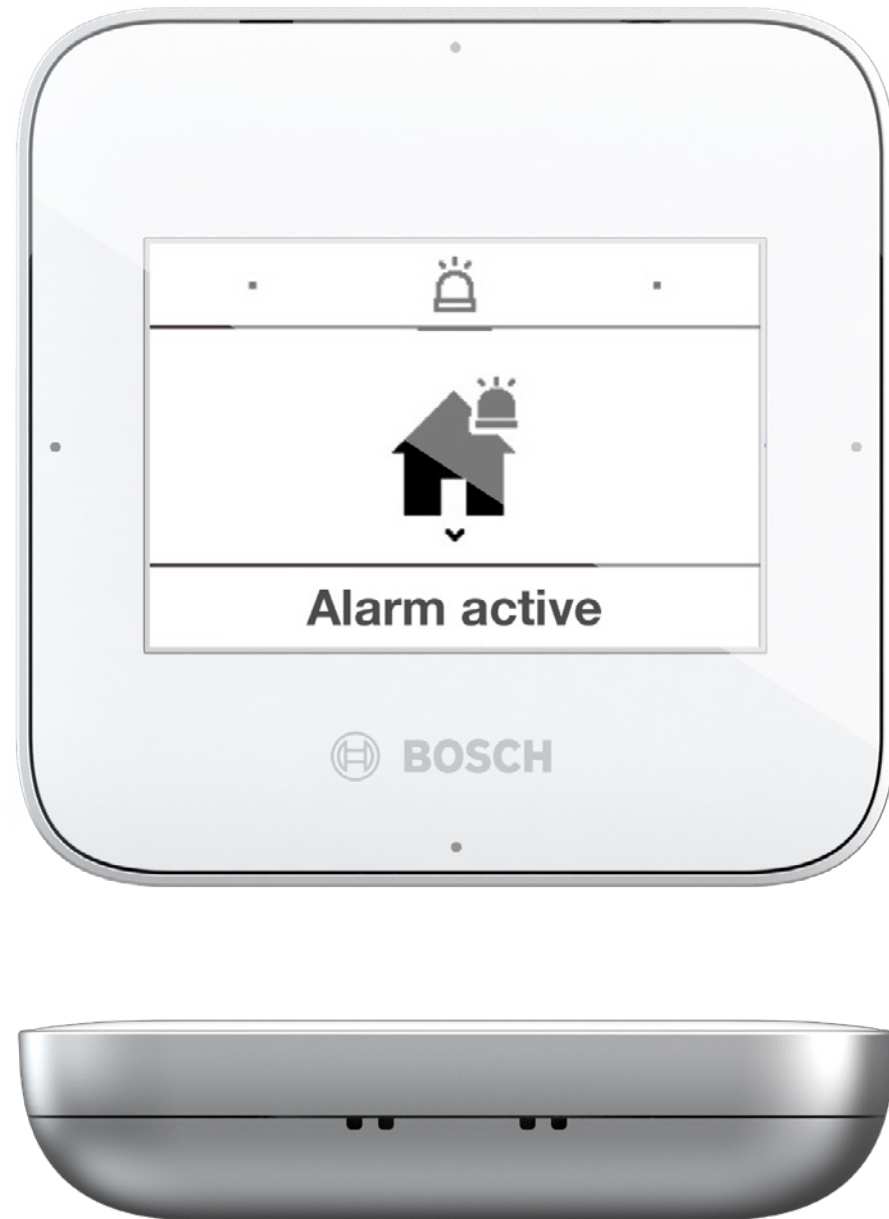

platinumdesign

TWIST

TWIST is a remote-control unit for all tasks in your smart home. Scenarios, alarm systems, lights, and more can be easily controlled – without a smartphone. You can carry TWIST anywhere in your home, or attach it magnetically to a wall.

Thanks to its innovative design, TWIST can be integrated into a variety of interior styles.

Its unobtrusive e-paper display is high-contrast and extremely energy-efficient.

TWIST IT

A special interactive feature is the ability to intuitively turn TWIST to the left or right in its wall holder, for example, to deactivate an alarm system.
